FACTORYTALK PUBLICATION

MES SUCCESS STORY
PT. DANKOS FARMA

After the first successful implementation of a Manufacturing Execution System (MES) to manage the raw material weighing & dispensing and finished goods check-weighing at Kalbe Farma, then the largest Indonesian pharmaceutical group has now completed the roll out of the same system at its subsidiary.

Factorytalk Co., Ltd together with their software partner Werum IT Solutions AG completed the project in less than 6 months using their globally experienced local ASEAN resources for the entire implementation involving technical engineers, business process and industry consultants and project management. The PAS-X solution went live in January 2015 and the proven benefits and further example of a MES implementation within the Kalbe group has lead the management to consider further expanding the use of the system to a full Electronic Batch Record (EBR). The EBR module will enable the end-to-end manufacturing process to be entirely paperless and provide key advantages for right first time operations, ensure the accuracy of tracking work in progress, and enforce a review by exception approach that is relied on by the majority of Werum’s PAS-X international customers.

“We have implemented a system for weighing and dispensing of raw materials and check weighing for finished goods to improve our efficiency and compliance. The Werum PAS-X system ensures the accurate weighing of the Bill Of Materials and is integrated automatically to the Oracle ERP for material data, production orders, bill of materials and consumption updates and stock creation. The system provides built-in best practices workflows, barcode scanning and integration to weighing devices together with easy to follow steps for operator instructions in Indonesian Bahasa language.” said Ms. Widyahwati Rahayu, Dankos Farma – Indonesia

Orchun Thakral, MES Project manager, Factorytalk Co., Ltd who managed and supported the project from the initial implementation to the Dankos roll-out provided the following statement. “We take pride in making a positive difference in the ASEAN pharmaceutical industry: by providing software solutions and services that drive rapid value into our customer’s business helping them to produce higher quality products and to achieve international standards together with the efficiency benefits of best in class technology.”

Don’t forget, there are many factors to a successful MES implementation – start by choosing solutions and services from Factorytalk and Werum.
